

# PRIME TYME TV

Your subscription includes 4 logins that can be used on any 4 devices on the same IP address/same household. They can be used with Firestick, Android Boxes and phones and Android TV.

This is a short video made by my friend to show installation on firestick

<https://youtu.be/gm IriL-1go>

## Installation instructions

### Using Downloader

You can skip the 2 steps below if you already have Kodi installed on firestick.

If you don't then click **settings/device/Developer Options/ADB DEBUGGING**, click it to turn on.

Go down one more and click **APS FROM UNKNOWN SOURCES**, then click **TURN ON**.

1. Search Amazon Store or Google Play store for Downloader. Download/install and open it.
2. Open Downloader and ok to any pop ups.

You should see <http://> already there with the cursor blinking. Complete it with **bit.ly/ptapks**

3. On the index page hover the red ring over PrimeTymeTV.apk and enter to download.
4. Next Click Install then on the next install screen click down to the lower right corner and choose install. When it's done choose open.
5. When it opens it will say error that there is no subscription. Click I HAVE A CODE and enter the 8 pin code you received, click submit and then ok on the welcome screen.
6. Enjoy 550 channels

### USING FIREDL

1. Search Amazon or Google Play Store for FireDL. Download/install/open
2. Once open enter the code 372776 and click download
3. Then click Install and on the next screen click Install again in lower right corner.
4. Open when done and click I HAVE CODE and enter your 8 digit code.
5. Click submit and then okay on the welcome screen.
6. Enjoy 550 Channels
